

# Our Latest Machine

## CNC Vertical Machining Center

As a leader in providing precision metal fabrication we are always seeking new ways to help our clients achieve more efficient and effective machining solutions. To do this we utilize the newest technologies to satisfy their discerning needs.

We are proud to now offer one of the industry's leading CNC Vertical Machining Centers. The Mazak Vertical Center Smart 530C is the largest in its class and touted as the most rigid CNC milling machine designed for the highest levels of productivity, accuracy, and reliability discerning companies can trust.

To ensure our clients parts are manufactured to the utmost accuracy and precision we also incorporate Mazatrol SMART CNC system which utilizes systematic programming functions to reduce time and deliver flawless parts in continuous succession for large volumes.

The performance of this machine is fast and efficient and provides unsurpassed value. Due to its large table and high speed automatic tool changer we work on a wide variety of applications from heavy duty machining to high speed machining.

We are confident you will find our new addition perfect for your precise requirements. Contact us today to see how Cebumicro can save you time and money in your fabrication needs.

Introducing the **SMARTEST** and **FASTEST** Machining Center on the market.

### Advanced Features of the **Mazak** Smart 530C

- Cam-driven tool changer for high-speed cycle times. 1.3 sec. tool to tool.
- High rigidity spindle with a max speed of 12,000 rpm
- Largest table and machining area of its class. 1300mm x 550mm.
- Active Vibration control to increase stability in all axes to deliver high quality surface finishes.
- Intelligent Thermal Shield to automatically compensate for room and tool temperature changes, optimizing accuracy.
- Eco-friendly design to reduce electricity costs, lubrication consumption and adding to the savings of our clients
